EDUCATION

GL Bajaj Institute of Technology and Management	Greater Noida, India
<i>B.Tech in Computer Science</i>	<i>2023 – 2027</i>
Class XII (Senior Secondary)	2022
<i>Lord Mother Public School</i>	73%
Class X (Secondary)	2020
<i>Saint Vivekanand Senior Secondary Public School</i>	83%

PROJECTS

Movie Recommendation System | *Python, Pandas, Scikit-learn*

- Developed a content-based movie recommendation system using cosine similarity on 5000+ movies
- Performed preprocessing and feature engineering on genres, keywords, and cast
- Generated top-N recommendations using optimized similarity matrix
- Improved recommendation relevance using vectorization techniques

Study Notion (Course Management System) | *Node.js, Express, MongoDB*

- Developed backend for a course management platform using Node.js, Express, and MongoDB
- Designed RESTful APIs for authentication, course enrollment, and progress tracking
- Implemented JWT-based authentication and role-based access control for secure access
- Optimized database queries, improving API response time and retrieval efficiency
- Processed datasets of 5000+ entries to build scalable and efficient solutions

TECHNICAL SKILLS

- **Languages:** C++, Python **Backend:** Node.js, Express.js **Database:** MongoDB, SQL
- **Core:** Data Structures (Arrays, Linked Lists, Recursion), Sliding Window, Two Pointers, OOPs, DBMS
- **Tools:** Git, VS Code

ACHIEVEMENTS

- Solved 200+ DSA problems on LeetCode, focusing on arrays, recursion, sliding window, and two pointers
- Strong understanding of arrays, recursion, sorting, sliding window, two pointers

CERTIFICATIONS

- Completed Software Engineering Job Simulation by Electronic Arts (Forage), performing tasks like feature proposal, game object design, and system improvement
